ERRATA ICD-10 MASTER INDUSTRY TABLE (MIT) OF 01 JANUARY 2014

It has come to the attention of the ICD-10 Ministerial Task Team that the description of Z09.0 on the ICD-10 Master Industry Table (MIT) dated 01 January 2014, is incorrect.

The words "Malignant neoplasms" should be removed from the full World Health Organisation (WHO) description. The correct description of Z09.0 is: Follow-up examination after surgery for other conditions.

We request schemes/administrators to take this into account and not to reject claims when a code is correct but the description is not correct.

Please update your records and processing of ICD-10 codes and descriptions to take account of this updated information.
