

## ERRATUM 2

### RE: HP13-2022ARV: REDUCTION IN ADVERTISED VOLUMES OF 84/90S PACKS OF TLD (TENOFVIR/ LAMIVUDINE/ DOLUTEGRAVIR) AND TEE (TENOFVIR/ EMTRICITABINE/ EFAVIRENZ)

We have reviewed the anticipated volumes of 84/90s packs of TLD and TEE, and after discussions with the provinces have decided to reduce the quantity being advertised.

Please note that the requirement for 28/30s packs of TLD and TEE remains, as per the HP13 ARV Invitation to Bid of 9 July 2021. The revised total requirement for TLD and TEE is aligned to expected patient numbers over the tender period.

Please note the adjusted requirement for 84/90s pack sizes, per the table below:

Item No	Description	Pack size	Current advertised volume	Revised volumes
14	TLD	84/90s	28 720 334	<b>9 573 445</b>
44	TEE	84/90s	6 689 206	<b>2 229 735</b>

**Kindly use the Erratum Excel Bid response with the adjusted volumes attached as Annexure B to this Erratum notice.**
